

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows.

1. (Currently amended) A cellular phone having a plurality of push buttons equipped with crime or disaster prevention means, comprising:

an extra push button for telephoning police, fire stations or security companies arranged at a predetermined position on its body and slightly recessed from a surface of the body, the extra push button colored differently than the plurality of push buttons; having a cover as a safety lock such as a cover arranged to cover the extra button for preventing inadvertent depression; and

a GPS function installed therein for informing the police, fire stations or security companies of instantaneous location of telephoner.

2. (Currently amended) A cellular phone according to claim 1, ~~wherein it further comprising~~ comprises a sounding function responsive to depression of the extra push button for producing a patrol, an ambulance siren or an utterance calling for help.

3. (Currently amended) A cellular phone according to claim 1, ~~wherein it further comprising~~ comprises a dog-sensitive ultrasonic wave transmitter equipped therewith.

4. (Currently amended) A cellular phone according to claim 1, ~~wherein it further comprising~~ comprises a red light flickering means equipped therewith.

5. (Currently amended) A cellular phone equipped with crime or disaster prevention means, comprising: according to claim 1, wherein it further comprises

an extra push button for telephoning police, fire stations or security companies arranged at a predetermined position on its body, the push button having a cover as a safety lock for preventing inadvertent depression;

a GPS function installed therein for informing the police, fire stations or security companies of instantaneous location of the telephoner; and

an automatic recording function for recording on-the-spot suffering situation or sufferings in the form of sound in real time.

6. (Currently amended) A cellular phone according to claim 1, ~~wherein it further comprising~~ comprises a transmitter section for automatically informing police or fire stations of the on-the-spot suffering situation or sufferings.

7. (Currently amended) A cellular phone according to any of claims 1, ~~wherein it further comprising~~ comprises a separate transmitter as attachment, the separate transmitter being designed so as to facilitate carrying the same with his or her body all the time, and so as to send signals to the cellular phone to make the extra push button work.

8. (Currently amended) A cellular phone according to claim 1, ~~wherein it further comprising~~ comprises a means for telephoning selected rescue centers in addition to the police, fire stations or security companies by using the GPS function for informing them of the instantaneous location of the telephoner.

9. (Currently amended) A cellular phone according to claim 7, wherein the separate transmitter is installed in ~~a small-sized article~~ a pendant or ring or a belt buckle which is worn by him or her all the time.

Please add the following new claim.

10. (New) A cellular phone according to claim 5, further comprising a plurality of push buttons, the extra push button slightly recessed from a surface of the body and colored differently than the plurality of push buttons, and the cover arranged to cover the extra push button and breakable by pushing.
